ATTACHMENT A**Scope of Services**

The State agrees to perform material inspection and testing services as requested by the Local Government. Material inspection and testing includes, but is not limited to, structural steel bridge fabrication, ultrasonic testing of structural steel bridge members, pre-cast concrete (stressed/non-stressed) products, and miscellaneous products.

Inspections will be performed in substantial compliance with the specifications and instructions supplied by the Local Government and at locations in Texas where the State routinely provides resident inspection services for its own highway materials. Out-of-state inspections for the Local Government will be performed only when the State has employees scheduled to conduct inspections for State projects at the requested locations.

As inspections and testing services are performed by the State, written reports will be provided to the Local Government. Reports will include the date time and nature of services performed and will be maintained by the State for a period of four (4) years following the expiration of the agreement.

The State and the Local Government shall mutually agree on inspection dates. The State reserves the right to reschedule inspections when it has been determined that inspection dates for the Local Government interferes with inspections for State projects.

Prior to TxDOT performing any inspections or testing, the Local Government will issue work requests. Each work request will include the following information.

- Project information (i.e., contract number, project control numbers, etc.),
- Work Description,
- Type and quantity of highway material(s) to be tested and/or inspected,
- Assigned fabrication for each highway material, .
- Desired date of inspection, and
- Signature and telephone number of authorized Local Government representative.

Changes to work requests will require a supplemental work request.
