

Be aware.  **Save lives.**

Work Zone Awareness
— April 11-15 —

Being Aware Here Can Save Lives

April 2022

National Work Zone Awareness Week (April 11 – 15) is held each spring to encourage safe driving in highway work zones.

This is for your safety and that of our employees and contractors. It might be surprising that four of five victims in work zone crashes are drivers, not highway workers.

In a work zone, you may have to change lanes or que up into narrowed lanes of traffic. Vehicles around you may slow or stop unexpectedly. Don't give in to distractions and slow down as needed. Pay close attention to the signs, instructing you on what to do.

Let's all be safe together.
