

# LET YOUR TOLLTAG TAKE YOU THERE

Follow these simple steps to ensure your TollTag is installed correctly, and you're receiving all your TollTag benefits!

- 1 Use rubbing alcohol to clean the center area on your windshield behind the rear-view mirror.

- 2 Hold your TollTag by its edges, then peel the clear adhesive backing slowly until it separates completely.

- 3 Hold part of the tag away from the glass with one hand and press to the glass. Gradually press the rest of the tag to the glass. Once attached, smooth out air bubbles with your thumbs.

- 4 Good installation, you're done.
