

## TOLLTAG INSIDER

April 2023

**FOUR WIDE:** The new extension is a four-lane bridge with shoulders over US 380. Located between PGA Parkway in Frisco and West First Street in Prosper, the bridge spans three quarter miles and includes entrance and exit ramps.

**BY THE NUMBERS:** At its highest point, the bridge reaches 55 feet high. To construct the bridge, crews used 200 columns ranging from 12 to 40 feet high. The bridge stretches 2,471 feet in the City of Frisco and 1,316 feet in the Town of Prosper.

**A NEW CITY:** With this extension, the Dallas North Tollway (DNT) now reaches the Town of Prosper. The DNT now covers total of 33 miles, running through five different cities (beginning in downtown Dallas).

**THE NEXT EPISODE:** The DNT Phase 4A project, which included the extension bridge, will lengthen the DNT from US 380 to FM 428 in Celina. Construction from W. First Street to FM 428 is expected to begin in mid-2024.

**WHERE NTTA ROADS GO, RSS GOES:** With the addition of the bridge, our Roadside Safety Services (RSS) crew has a little more ground to cover these days. If you need a gallon of gas, minor car repairs or help with a flat tire on any NTTA road, just dial #999 for FREE roadside help.
