

CONSTRUCTION ALERT

DNT mainlane bridge maintenance will take place this spring between Downtown Dallas and I-635

As part of maintenance on the south end of the Dallas North Tollway (DNT) this spring, multiple bridges will be repaired and resurfaced.

WHY: This work is part of NTTA's continuing effort to maintain the reliable, high-quality roads our customers expect.

WHERE: The DNT mainlane bridges above Harry Hines Blvd., Wycliff Ave., Lemmon Ave., Lovers Ln., Forest Ln. and Inwood Rd. will be repaired this spring.

DNT mainlane bridge resurfacing will be completed using a two-lane closure in each direction, so no full closure will be needed. Only one bridge will be closed at a time. Drivers should expect delays during construction.

WHEN WORK WILL OCCUR:

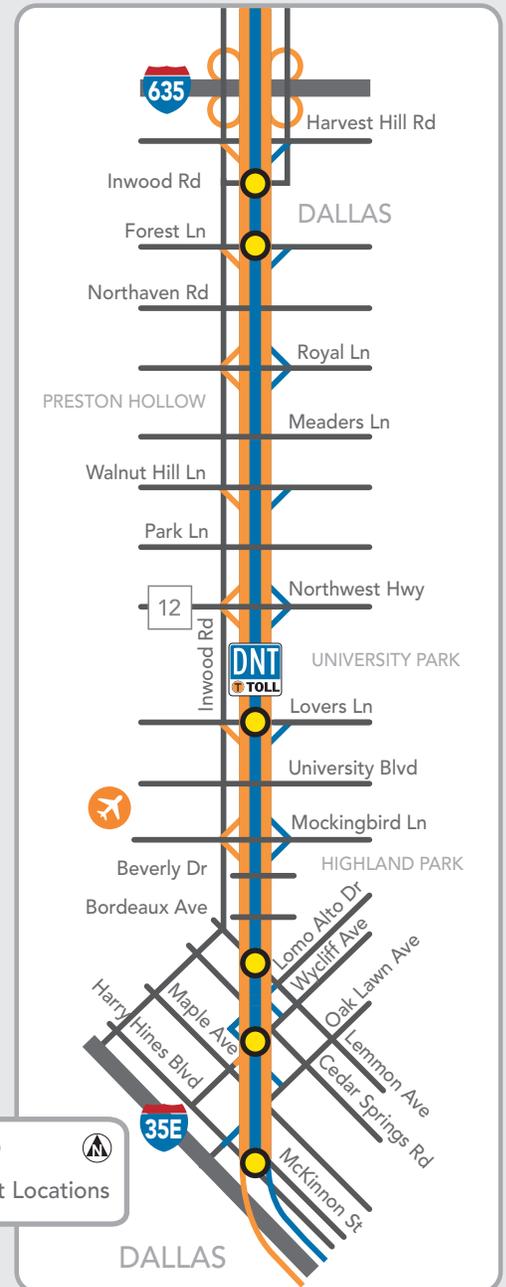

Work will begin Friday, March 20 at Lemmon Ave. and Wycliff Ave. and occur most weekends through May 2026. Closures will be continuous each weekend from 10 p.m. Friday to 5 a.m. Monday.

Traffic Alerts and maps of the area will be shared for each weekend closure with the media and on NTTA's social media pages. *Closures will not occur the first weekend in April.*

All closures are subject to weather conditions and, if necessary, will be postponed.

See map for additional information.

We appreciate your patience as we maintain our North Texas roadways.
