

# TOLLTAG INSIDER

Drivers, fill up your fuel tanks. NTTA customers have more room to roam with expanding TollTag travel options. The TollTag can now be used for electronic toll payment on participating roads in seven more states, joining a lineup that already includes toll roads in: all of Texas, Oklahoma, Kansas, and most of Florida and Colorado.

## Additional States Where TollTag is Now Accepted

- **Illinois:** Illinois State Toll Highway Authority, Chicago Skyway
- **Indiana:** Indiana Toll Road
- **Maryland:** Maryland Transportation Authority
- **Massachusetts:** Massachusetts Department of Transportation
- **North Carolina:** North Carolina Turnpike Authority
- **Pennsylvania:** Pennsylvania Turnpike Commission
- **Ohio:** Ohio Turnpike

## How It Works

When an NTTA customer uses a participating out of area toll road, the toll is automatically deducted from the customer's existing TollTag account. The transaction appears on their monthly NTTA statement and they receive the lowest toll rate offered to customers in participating states.

NTTA expects to add states to the travel network in the coming months through 2028. Check [NTTA.org](https://www.ntta.org) for details about where your TollTag can take you.

## Customer Support

As always, NTTA customers with questions about TollTag transactions should contact [NTTA Customer Service](https://www.ntta.org/customer-service). Out of state customers with transponders issued by another tolling agency should contact their home agency for assistance.
