TOLLTAG INSIDER

Winter weather can sweep into North Texas with little warning, bringing freezing temperatures, icy roads, and hazardous driving conditions. Preparing now can help protect yourself and your loved ones when temperatures drop.

Before heading out, take a few minutes to make sure your vehicle is safe to drive in unexpected winter weather conditions. Check your vehicle's tire pressure, battery, windshield wipers, lights, and fluids levels, and make sure you have an emergency kit with essentials such as a blanket, phone charger, water, and a flashlight. It's also good practice to check the weather and traffic conditions before you leave and give yourself extra time to reach your destination.

If there are icy road conditions, remember to slow down, stay alert, and leave plenty of space between your vehicle and the one ahead. Bridges and overpasses can freeze before other road surfaces, so avoid sudden braking, acceleration, and steering when driving through these areas.

If you ever have car trouble while driving on an NTTA road, move your vehicle out of the travel lanes to a secure location and dial #999, NTTA's FREE 24/7/365 Roadside Safety Services (RSS). Turn on your hazard lights, stay inside with your seat belt fastened, and let our RSS crews help get you moving again.

Wherever your holiday travels take you, a few thoughtful steps before you go can make the journey smoother. Be prepared and drive with proper precautions to reach your destination safely and enjoy the season.

Safe travels!
